

# One Free Water Analysis

Bring in a 1 cup sample of water from pool or hot tub (no more than 1 hour old).

Let our staff run your pool or spa water sample through our computerized water lab to give you a detailed water analysis. This analysis will even give you a recipe with what chemicals you will need and how much you need to dose to get your pool or spa in perfect balance. You too can join the many happy customers we already have that are able to enjoy their pool and/or spa knowing their water is safe to be in and trouble free.

To properly give you this free water analysis we will need the following information filled out when you bring this coupon in to redeem it.

Name: \_\_\_\_\_

Address: \_\_\_\_\_
